

Help on replacing the Winegard Elevating Shaft.

We supply a number of parts for DIY repair of the winegard Antenna. These instructions are also used for initial installation, where the elevating shaft has been removed prior to shipment to prevent damage.

**WARNING!! Do not loose the small washer on the elevating arm.**

1) Above: Remove the plastic retaining cap.

2) Above: Hold the top arm about half way open and screw in the elevating arm.

3) Above: Screw down until the top is almost flush with housing.

4) Above: Replace retaining cap. Follow remainder or antenna installation instructions.
